

MICROSOFT FOUNDRY STUDIO LAB -1

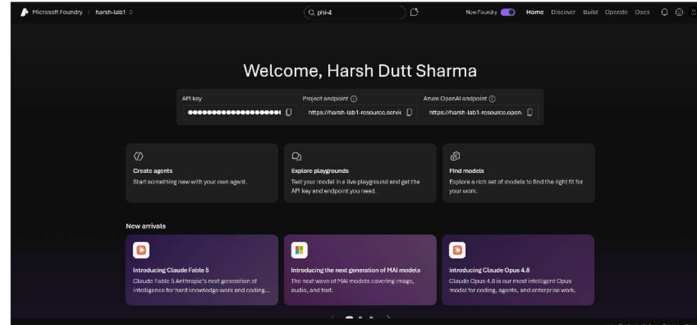

[Submitted By : Harsh Dutt Sharma]

Exploring the Microsoft Foundry studio and connecting AI Foundry to VS Code end-to-end.

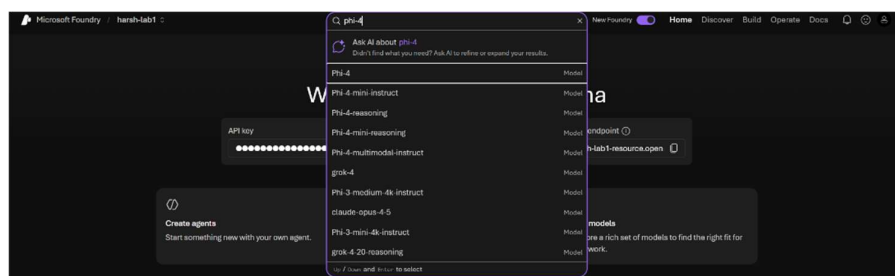

1.Microsoft subscription screenshot :

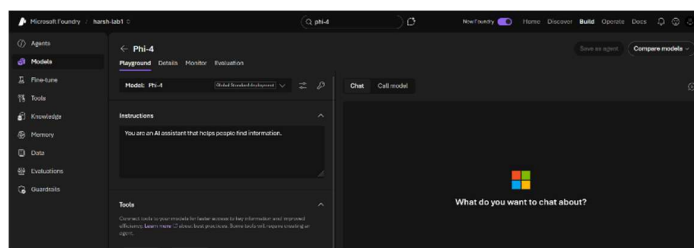

2.Microsoft Foundry portal login :

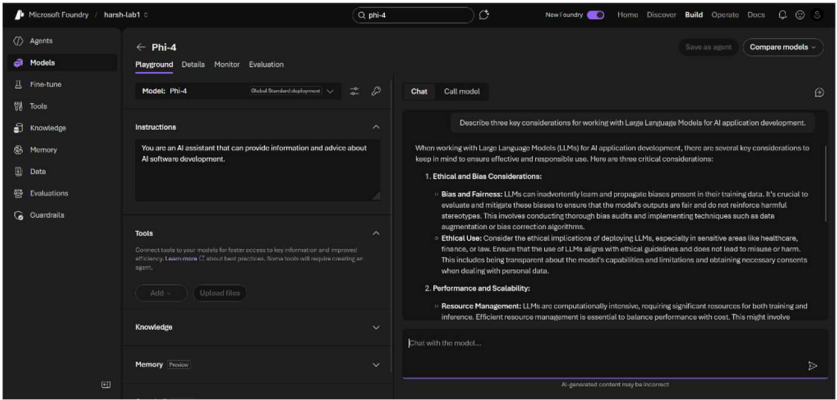

3.Using the Phi-4 models to complete the lab(gpt-4,other models are showing errors like unavailable quota or they are not available in the region):

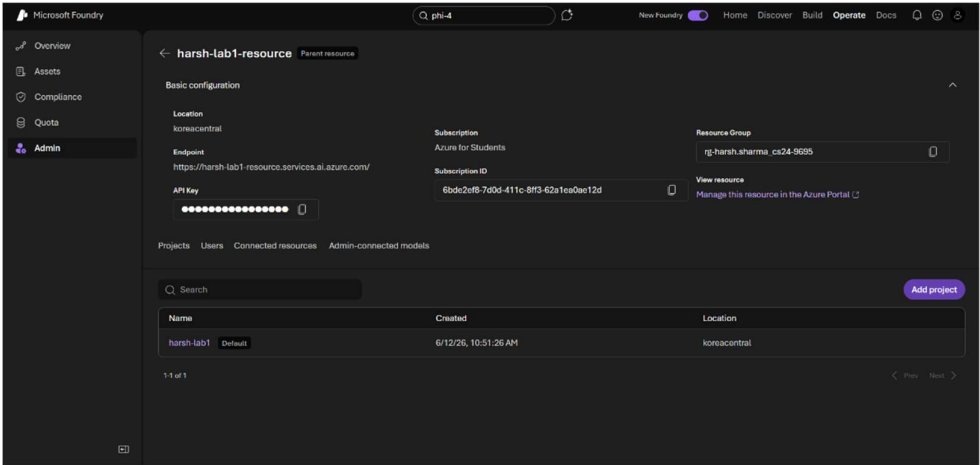

4.Deployed the Phi-4 model :

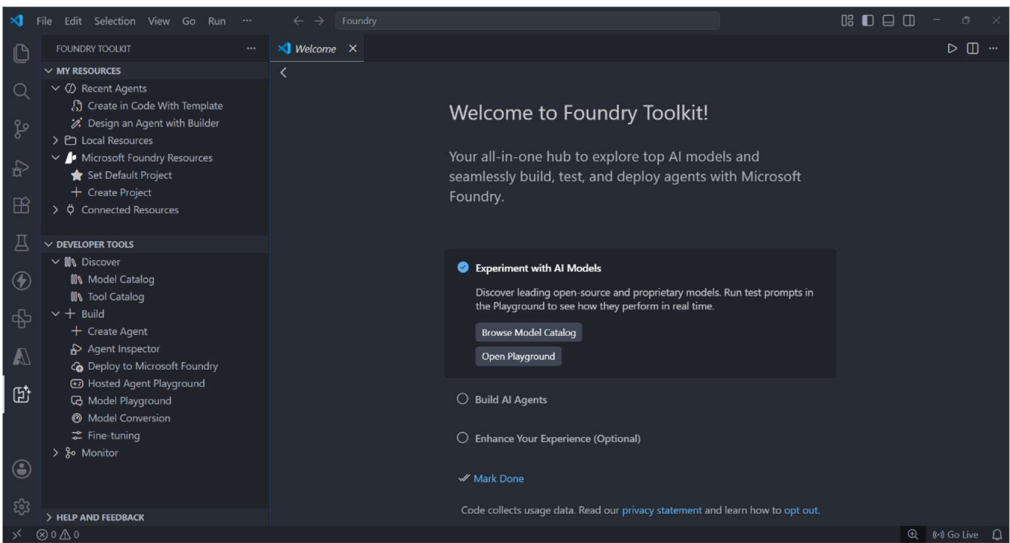

5.Playground testing :

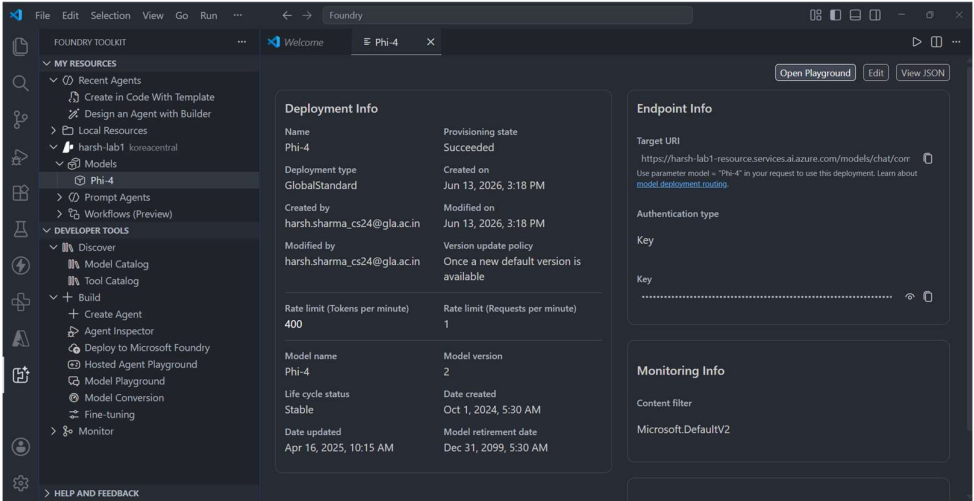

6.Capturing the endpoint and parent resource :

7.Connected the Foundry Toolkit with the Visual Studio Code :

8.Attaching the deployed model screenshot from the Visual Studio Code:

9.Playground testing in the Visual Studio Code:
