

MICROSOFT FOUNDRY LAB – 1

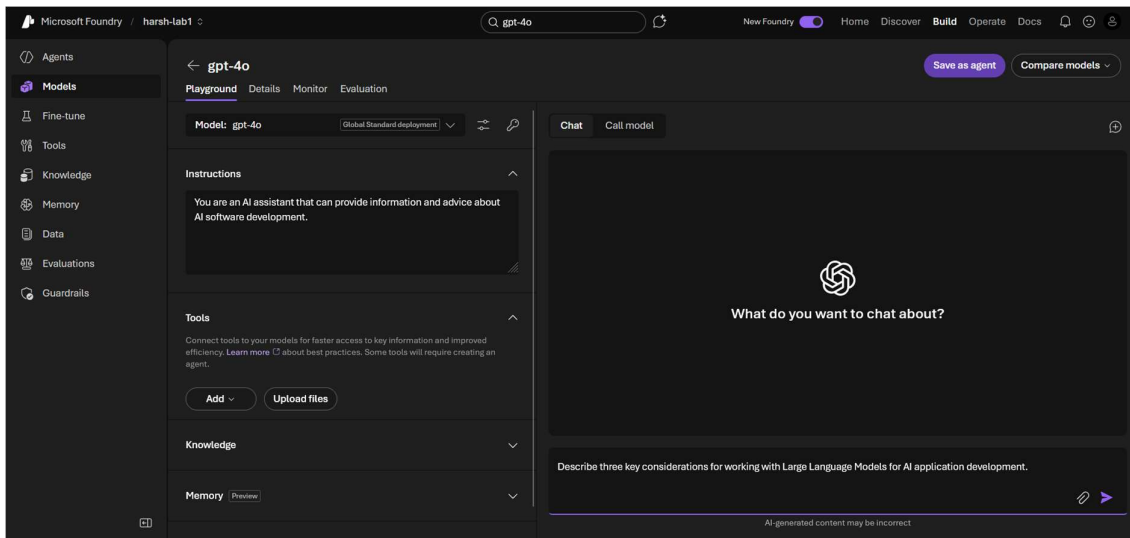

[Submitted by : Harsh Dutt Sharma]

#Setting up Microsoft Foundry :

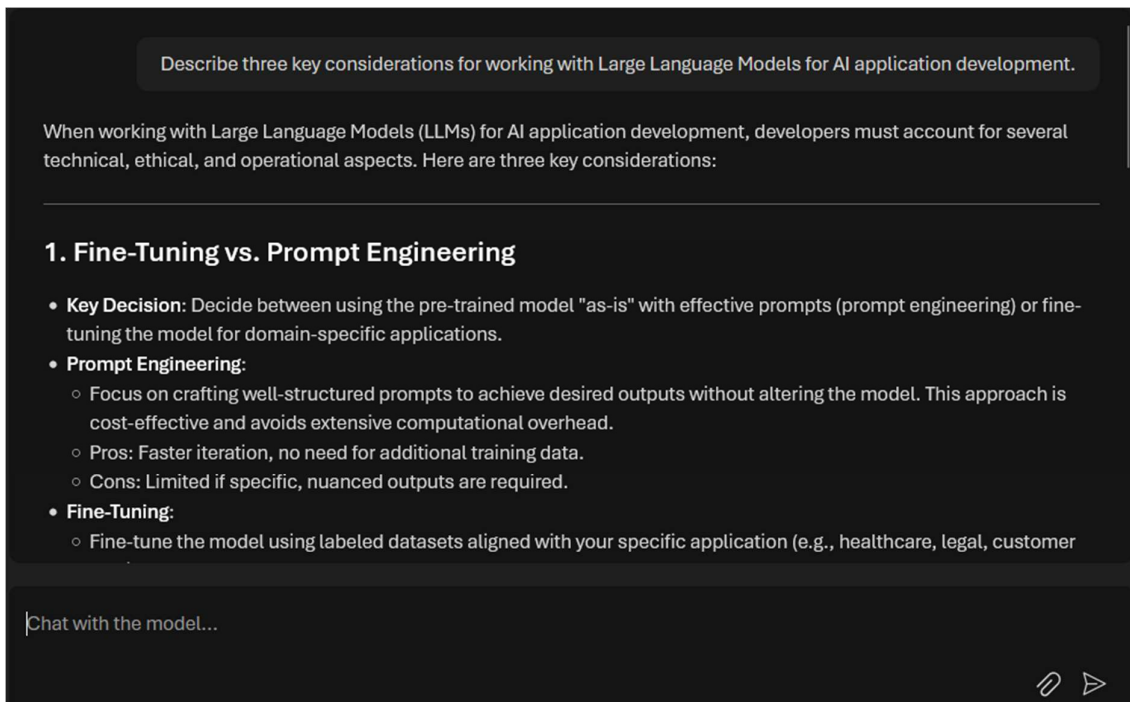

1. Microsoft Foundry project page and successfully created a new project named as harsh-lab-1.

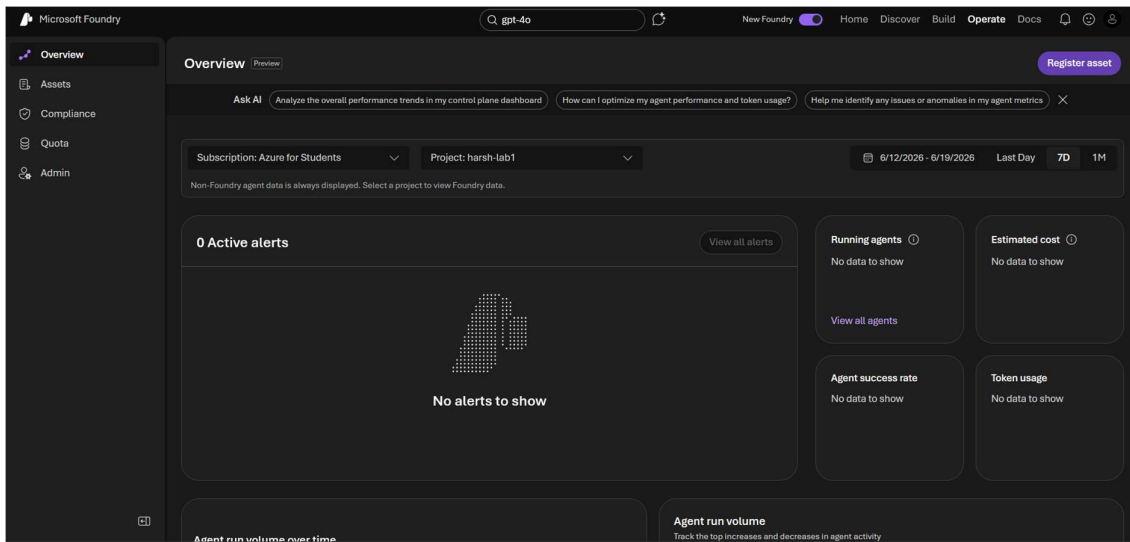

2. Playground of the gpt-4o model :

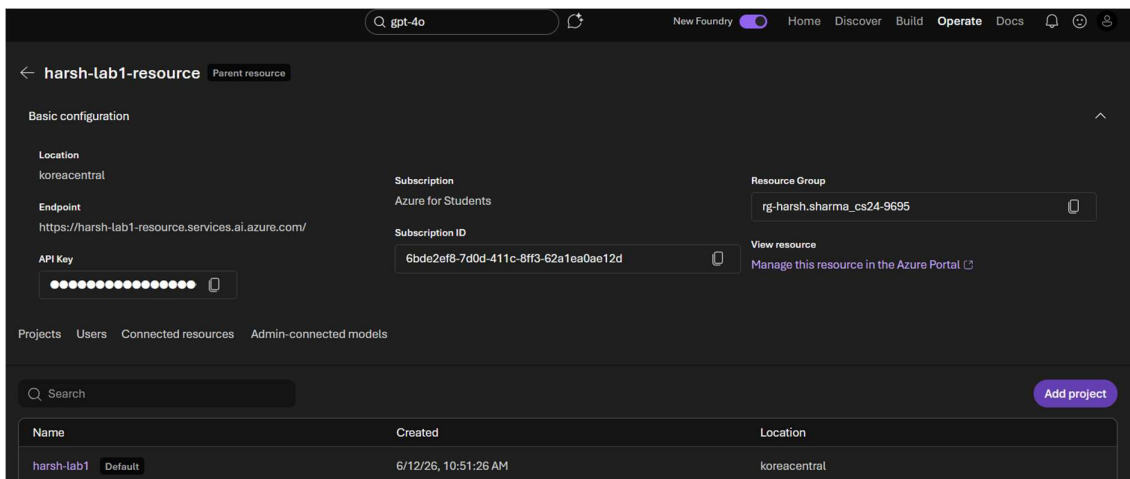

3. Output of the prompt :

4. Overview page :

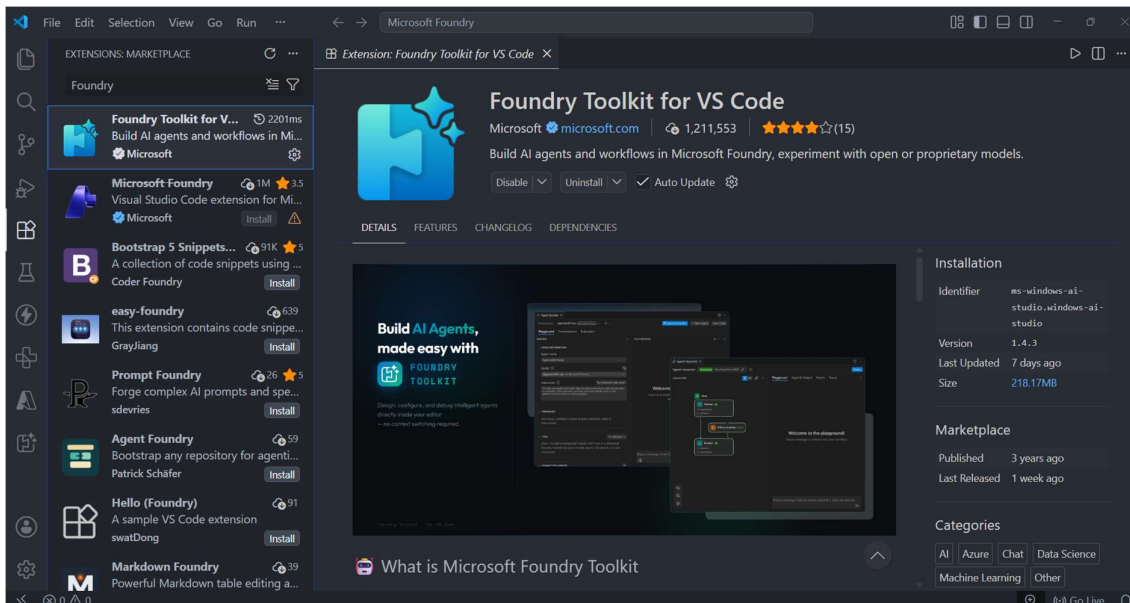

5. Azure Resource and Endpoint :

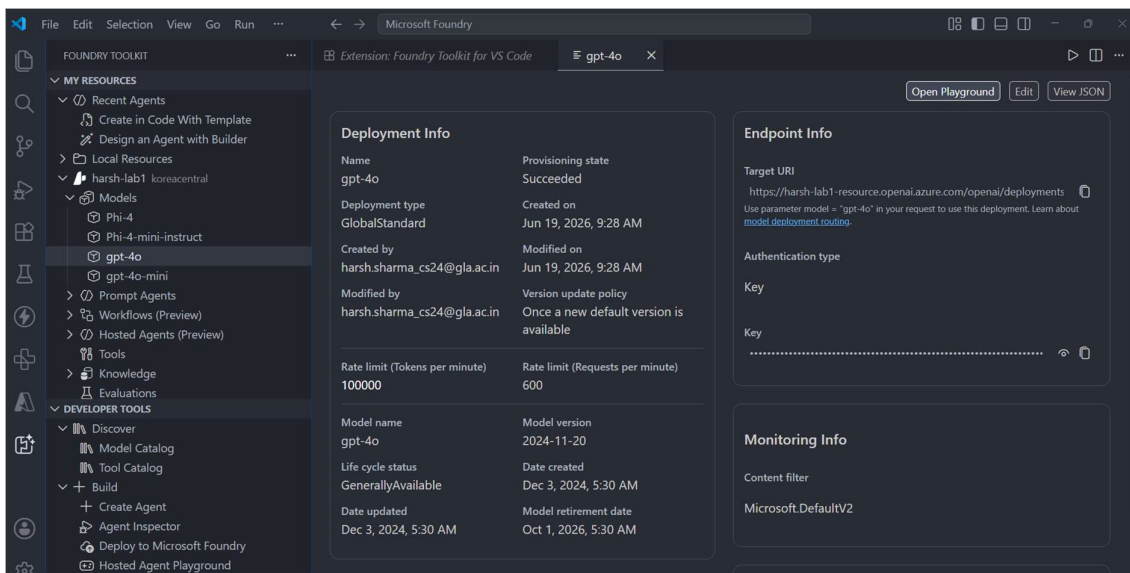

#Installing VS Code extension for Microsoft Foundry :

1. Foundry toolkit for VS Code

2.GPT-4o deployment details on VS Code :

3.Playground testing on VS Code :

WRITE A PYTHON PROGRAM TO Compare

 User

Write a Python program to calculate the factorial of a number using recursion.

 gpt-4o

Here is a Python program to calculate the factorial of a number using recursion:

 python

```
def factorial(n):  
    """  
        Calculate the factorial of a number using recursion.  
  
        :param n: Non-negative integer whose factorial is to be  
        calculated.  
        :return: Factorial of the given number.
```
