

MICROSOFT FOUNDRY LAB – 2

[Submitted by : HARSH DUTT SHARMA]

#Objective : To explore Microsoft Foundry Model Catalog, compare different foundation models, and evaluate their performance using built-in evaluation metrics and datasets.

1.Prepared the playground for the comparison of two models(gpt-4o and gpt-4o-mini).

2.Playground testing of both the models.

#Evaluation(after prompt) :

Criteria	GPT-4o	GPT-4o-mini
Problem Solving Accuracy	Solved correctly	Solved correctly
Reasoning Quality	Detailed and structured reasoning	Correct but less detailed
Clarity	Longer explanation	Shorter explanation
Speed	Very clear step-by-step solution	Clear but concise
Detail Level	Slightly slower	Faster
Overall Performance	Better reasoning and explanation	Efficient and light

#Evaluating the model with a synthetic dataset

1.Creating a new evaluation.

2.Running evaluations :

3.Result after evaluation(for gpt-4o) :

☐ Name	Target	Dataset	Status	Created by	Created on	Token usage
☐ gpt-4o	gpt-4o	gpt_4o_f70h8yt9cs Version 1.0	Completed	Harsh Dutt Sharma	6/19/26, 5:12:54 PM	Evaluated system tokens: 37,479 Evaluation tokens: 480,549

Groundedness	Fluency	Coherence	Relevance	DeflectionRate
100% 41 / 41	100% 41 / 41	100% 41 / 41	100% 41 / 41	100% 41 / 41

4.Repeated the same evaluation for the gpt-4o-mini model.

☐ gpt-4o-mini	gpt-4o-mini	gpt_4o_f70h8yt9cs Version 1.0	Completed	Harsh Dutt Sharma	6/19/26, 5:37:10 PM	Evaluated system tokens: 25,031 Evaluation tokens: 405,439
--------------------------------------	-------------	----------------------------------	-----------	----------------------	------------------------	---

Groundedness	Fluency	Coherence	Relevance	DeflectionRate
100% 41 / 41	100% 41 / 41	100% 41 / 41	100% 41 / 41	100% 41 / 41

5.Results after evaluation(gpt-4o as the baseline model) :

Baseline * 		
gpt-4o 		
Name	gpt-4o	gpt-4o-mini
Groundedness	5.00 Baseline	5.00 Inconclusive
Fluency	4.24 Baseline	4.17 Inconclusive
Coherence	5.00 Baseline	5.00 Inconclusive
Relevance	5.00 Baseline	5.00 Inconclusive
DeflectionRate	0.00 Baseline	0.00 Inconclusive

#Observation :

1. Explored the Microsoft Foundry Model Catalog and deployed GPT-4o and GPT-4o-mini models.
2. Compared both models using reasoning-based prompts and observed differences in response quality and detail.
3. GPT-4o generated more detailed responses, while GPT-4o-mini produced faster and concise outputs.
4. The evaluation was successfully completed using a travel-related dataset and achieved high scores across all selected metrics.

#Conclusion :

This lab provided hands-on experience in exploring, deploying, comparing, and evaluating foundation models using Microsoft Foundry. Both GPT-4o and GPT-4o-mini performed effectively, with GPT-4o offering more detailed responses and GPT-4o-mini providing efficient performance. The evaluation results demonstrated the reliability of Microsoft Foundry for assessing AI model quality and performance.
